

Truck Tunes 4 Lyrics

1. SNOWCAT

Check out this
Amazing snow machine
Who without his tracks
He couldn't do a thing
Woh -oh
Not in the snow

They keep his footprint light
His ground pressure low
So he doesn't get stuck
In the deepest snow
No no
Not in the snow

Hey Hey Hey!

With his special skills
He goes grooming all the hills
He's a Snow Cat, oh!
Working through the night
Sculpting, shaping powder right
He's a Snow Cat, oh!

He shapes the trail
Carving with his blade
To say 'hey' to his buddies
He just gives them a wave
Hello, Hello
He loves the snow

In back the tiller
Treats the snow like its feast
While with wings on each side
He smoothes the run like a beast
Woh -oh
Just watch him go

With his special skills
He goes grooming all the hills
He's a Snow Cat, oh!
Working through the night
Sculpting, shaping powder right
He's a Snow Cat, oh!

He's well equipped
With gear and features galore
To make working more fun
For his operator
Woh -oh
They love the snow

Window defrosters
And so many controls
With his heated cab
Keeping out the cold
Oh, even tho-ough
It's ten belo-ow

Hey Hey Hey!

With his special skills
He goes grooming all the hills
He's a Snow Cat, oh!
Working through the night
Sculpting, shaping powder right
He's a Snow Cat, oh!

With his special skills
He goes grooming all the hills
He's a Snow Cat, oh!
Working through the night
Sculpting, shaping powder right
He's a Snow Cat, oh!

2. ROAD ROLLER

Rollin' slowly, rollin' slowly
Rollin' slowly just to firm up the ground
She is rollin' slowly, rollin' slowly
Rollin' slowly just to firm up the ground

Just watch as she compacts
Hardens all the surface on initial contact
Her main job is to make the ground much more dense
The soil and asphalt become really intense

She'll have one or maybe two big drums
When there's one call it a single and with two a tandem

And these drums can each weigh a ton or two
Yeah, cause they have some tough and major rolling to do

Oh! She's rollin' slowly, rollin' slowly
Rollin' slowly just to firm up the ground
She is rollin' slowly, rollin' slowly
Rollin' slowly just to firm up the ground

She's careful and sure
Her work will endure
Cause she's rollin' slowly just to firm up the ground
She's heavy and mean
A road rollin' machine
Oh she's rollin' slowly just to firm up the ground

Someone much older than you
Might just call this truck a Steam Roller, too
Because they used to run on steam, as a rule
But today they run mainly on diesel fuel

Now, some drums are static and some vibrate
All that shake-shake-shakin' gives her more weight
There are some who add water for the same effect
When it comes to rolling rolling, she has our respect

Cause she's rollin' slowly, rollin' slowly
Rollin' slowly just to firm up the ground
She is rollin' slowly, rollin' slowly
Rollin' slowly just to firm up the ground

She's careful and sure
Her work will endure
Cause she's rollin' slowly just to firm up the ground
She's heavy and mean
A road rollin' machine

Oh she's rollin' slowly just to firm up the ground
She is slow and she's cool
She's handy and you'll
Soon be rollin' slowly just to firm up the ground
She's heavy and mean
A road rollin' machine
Oh she's rollin' slowly just to firm up the ground

3. CONCRETE BOOM PUMP

Working early in the morning
Starting out at day's first light
He's got a lot of work to do, yeah
And he works with all of his might

Once at the work site he sets things up
Carefully getting his outriggers placed
He'll be pumping tons of concrete, pumping tons of concrete all day
So he's gotta have a steady base

Concrete Pump, Concrete Pump
Boo-oo-oom
Concrete Boom Pump

Concrete Pump, Concrete Pump
Boo-oo-oom, boo-oo-oom

Mix trucks load up the concrete
His hopper's filled again and again
Then from this central location
He reaches out his boom and extends

He manages the pour from below
Properly regulating how it flows
He maneuvers his robotic, maneuvers his robotic arm, oh,
Yeah, it's guided by remote control

Concrete Pump, Concrete Pump
Boo-oo-oom
Concrete Boom Pump

Concrete Pump, Concrete Pump
Boo-oo-oom, boo-oo-oom

Some trucks boast impressive pump rates
Beyond a hundred yards for every hour
The pressure this requires is great
It takes a massive surplus of power

See how his arms have multiple parts
Each one articulated and so strong
Flexible joints keep them together, his joints keep them together, and woh!
Some arms are two hundred feet long!

Concrete Pump, Concrete Pump
Boo-oo-oom
Concrete Boom Pump

Concrete Pump, Concrete Pump
Boo-oo-oom, boo-oo-oom

Concrete Pump, Concrete Pump
Boo-oo-oom
Concrete Boom Pump

Concrete Pump, Concrete Pump
Boo-oo-oom, boo-oo-oom

4. SKIDSTEER

How does this truck steer
When his wheels only go straight?
He's able to turns thanks to a trick
That's his namesake

When his right wheels go faster than his left
The left skids and he turns left
When his left side wins, he turns right
Just like you might have guessed
(Watch him pirouette!)

He loves to show off what he can do
Doing tricks while he gets work done
Doesn't stop till the job is through
No the Skidsteer is just the one
Who's always having fun
Skidsteer is always having fun
Skidsteer is always having fun

There aren't many jobs
He won't easily tackle
Like tearing down a wall
With the help of a grapple

Even though he may seem pretty small
Skidsteer's one tough cat
This one here has solid tires
That never will go flat

He loves to show off what he can do
Doing tricks while he gets work done
Doesn't stop till the job is through
No the Skidsteer is the one
Who's always having fun
Skidsteer is always having fun
Skidsteer is always having...

He's so functional
That the others can't compete
See him using forks to break up
Asphalt and concrete

His attachments make him versatile
But there's one that he likes best
(Can you guess which it is?)
That's right, it's his bucket
He just thinks it's handiest

He loves to show off what he can do
Doing tricks while he gets work done
Doesn't stop till the job is through
No the Skidsteer is the one
Who's always having fun
Skidsteer is always having fun
Skidsteer is always having fun
Skidsteer is always having fun
Skidsteer is always having fun

5. LANDFILL COMPACTOR

You can do the math
Still it's hard to factor
The raw strength
Of this tough compactor

Call him a truck
Or call him a tractor
When he's crushing trash
Come on, it doesn't matter

Yes, his job is to compact waste
Always maximizing the compaction rate (so come on)
Smashing junk so it stays in place
Crushing it down to take up minimal space

So come on compact
Landfill Compactor

You can do the math
Still it's hard to factor
The raw strength
Of this tough compactor

Call him a truck
Or call him a tractor
When he's crushing trash
Come on, it doesn't matter

Those pointed teeth on his steely drums
Their force per square inch is greater than two tons (so come on)
He moves trash with his dozer-like blade
While his spiked wheels shred everything in their way

You can do the math
Still it's hard to factor
The raw strength
Of this tough compactor

Call him a truck
Or call him a tractor
When he's crushing trash
Come on, it doesn't matter

Life at the landfill can be very hard
So his engine and power train are shielded by guards
And to help his teeth stay sharp and clean
A striker bar blocks all the junk and debris

So come on compact
Landfill Compactor

You can do the math
Still it's hard to factor
The raw strength
Of this tough compactor

Call him a truck
Or call him a tractor
When he's crushing trash
Come on, it doesn't matter

6. POLICE VEHICLES

Just doing their job
On the streets day and night
Police trucks and cruisers and fast motor bikes
Sounding their sirens and flashing their lights
Just doing their job, yeah, they're doing it right

What does he do on patrol?
Well he's on the lookout for trouble, so
Listens close to the calls on his radio
And checks the data on his terminal

Oh these cars aren't hard to identify
With their lights, their gear, and marks on every side
But when he is unmarked, well he just might hide
That is, until he turns on his lights

Just doing their job
On the streets day and night
Police trucks and cruisers and fast motor bikes
Sounding their sirens and flashing their lights
Just doing their job, yeah, they're doing it right

Look! Here's a police SUV
Oh her size gives her more functionality
She can load up more gear, leaving nothing behind
Has plenty of room for this special K9

When she's asked to take a call off-road
Oh, she's got all the clearance to go, you know
Oh she's brave, and she's strong and professional
There aren't many places she can't easily go

Just doing their job
On the streets day and night
Police trucks and cruisers and fast motor bikes
Sounding their sirens and flashing their lights
Just doing their job, yeah, they're doing it right

Here's one more vehicle
It's the fast and agile Police Motorcycle
Who is quick to respond to an accident scene

They're skilled and alert, prepared for anything

To stay cool means lots of practice, you know
It takes training for every scenario
So they all have their own special facilities
Where they work to improve their abilities

Just doing their job
On the streets day and night
Police trucks and cruisers and fast motor bikes
Sounding their sirens and flashing their lights
Just doing their job, yeah, they're doing it right

Just doing their job
On the streets day and night
Police trucks and cruisers and fast motor bikes
Sounding their sirens and flashing their lights
Just doing their job, yeah, they're doing it right

7. AMPHIBIOUS TRANSPORT

Is it a boat?
Is it a truck?
Sure it can float
And we call it a Duck

Oh, they can go on the water
And drive up on land
It's an Amphibious Transport
Doing all that they can!

Their first job
Was to carry soldiers
And other crucial supplies
Over the water
Onto the beaches
Their job was to save precious lives

Is it a boat?
Is it a truck?
Sure it can float
And we call it a Duck

Oh, they can go on the water
And drive up on land
It's an Amphibious Transport
Doing all that they can!

Now they do Duck Tours
Loaded with tourists
Who travel through the city for fun
Seeing the sites
Learning their history
On land and water, oh they get the job done

Is it a boat?
Is it a truck?
Sure it can float
And we call it a Duck

Oh, they can go on the water
And drive up on land
It's an Amphibious Transport
Doing all that they can!

Now count up the wheels
How many wheels?
Six wheels
And all of them drive

Again now!
Count up the wheels
How many wheels?
Six wheels
And all of them drive

Come on now
Head out on water
Drive up on land

Head out on water
Drive up on land

Is it a boat?
Is it a truck?
Sure it can float
And we call it a Duck

Oh, they can go on the water
And drive up on land
It's an Amphibious Transport
Doing all that they can!

8. TOW TRUCK

When a car is down on its luck
When it breaks, overheats or gets stuck
That's when she does her stuff
And her stuff is more than enough
That's when you call, when you call, when you call a Tow Truck

When we're talking Tow Trucks
Well there are different types
This one's a flatbed
That's because her bed is flat
Her bed can roll back, can roll back or slide, oh!

Then the car she's giving a tow
Is all prepared to go
You gotta know, gotta know
How she's gonna go go
It's pulled up with a winch
It makes her job a cinch
That's why you call, why you call, why you call out for a tow

T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow
Tow Truck
T-tow, T-tow, T-tow, T-tow, T-tow
Tow Truck

Now this truck is no joke
See her lift with a boom and a yoke
We call her a wheel-lift
That's because she lifts the wheels
Her hoist is powerful, powerful, she's got power, oh!

Which side is she liftin?
Well, you know, it all depends
She's good to go, good to go no matter what you need to tow
Rear drive, she lifts the back
Front drive, the front's where it's at
She makes the call, makes the call, makes the call, for the tow

T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow
Tow Truck

T-tow, T-tow, T-tow, T-tow, T-tow
Tow Truck

Drive me safely home, Tow Truck
Drive me safely home.

Drive me safely home, Tow Truck
Drive me safely home.

When a car is down on its luck
When it breaks, overheats or gets stuck
That's when she does her stuff
And her stuff is more than enough
That's when you call, when you call, when you call a Tow Truck

T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow, T-tow
Tow Truck

T-tow, T-tow, T-tow, T-tow, T-tow
Tow Truck

9. FLATBED

Packs up with lumber and construction supplies
So his destination should come as no surprise
Yes, he's fully loaded up and tied down really tight
Making yet another run to the building site

His bed is flat, it's true
Makes loading easier
And unloading too
Flatbed truck why don't you
Show us all the many things you can do

For extra big jobs he takes a friend along
His buddy is the Forklift, and well she's pretty strong
Some Flatbeds even have a crane that's fully built right in
And without this feature unloading won't begin

His bed is flat, it's true
Makes loading easier
And unloading too
Flatbed truck why don't you
Show us all the many things you can do

When loading's all done he's got to be quite sure
His cargo's one hundred percent tightened and secure
He straps it all down, and cinches it up
You bet you can be certain he's one careful working truck

Oh, while you're certain to see Flatbeds in town
On freeways and on highways he'll also be around

No, he's not out there driving just to see the scenery
In fact, he's moving heavy, moving heavy machinery

His bed is flat, it's true
Makes loading easier
And unloading too
Flatbed truck why don't you
Show us all the many things you can do

10. PAVER

Making smooth roads
Well, that is his thing
He's a Paver you know
A hot paving machine

The Dump Truck, he provides
The material, material supply
Of the asphalt that he loads up high
Into the hopper on one side

And the conveyor moves all the while
So the auger can stockpile
The asphalt for the screed
That spreads with smoothest style

Making smooth roads
Well, that is his thing
And wherever you go
While out driving, you sing
He's a Paver you know
A hot paving machine

He's got no need, no need for speed
Cause he's constant, and he's steady indeed
He may look slow, but that's how he goes
To be certain to maintain control

With weight and intense heat
He lays down a smooth street
He might use a tamper bar
To get the job complete

Making smooth roads
Well, that is his thing
And wherever you go
While out driving, you sing
He's a Paver you know
A hot paving machine

Well he's real smart, make no mistake
To work all the calculations he makes
Figures the slope out, and he works out the crown
And the super, superelevation

The Paver works so well
That when Roller comes to help
You might just hear him say
"I can do this all myself!"

Making smooth roads
Well, that is his thing
And wherever you go
While out driving, you sing
He's a Paver you know
A hot paving machine
